- * April 9, 2022 Field trip to Diamond Pacific
- * April 16, General Mtg.
- * April 30, Shop clean up

Hello and welcome all,

I still don't know if spring is coming or winter is going to linger longer. To tell the truth, I'm looking for warmer weather. Since now I've said it, it will get too hot too soon. I am grateful for the perfect weather on Saturday during the tailgate.

Well March Tailgate has come and gone. I would like to thank all who helped set up and take everything down and pack it up. I also thank the members that helped with the silent Auction and the Pups table. If you don't see your name here, it's because I have trouble with names. So I will do a general thank you to all! You are much appreciated. I will have the treasurer inform us at the general meeting how well we did.

Don't pat ourselves on the back , just yet. While we were out at the tailgate the shop was vandalized. Dave went to the shop on Saturday and found that we didn't have power, he had to throw out the food in the freezer. On Sunday, because there was more evening light, he could see the extent of the damage. We not longer have an air conditioner/heater. The process is in motion, police report, estimates, and contacting the insurance company to replace and install it. If you pass by the club keep an eye on it. Don't confront anyone, let us know or call the police if you have to.

Don't forget the general meeting on Saturday the 19th at noon. The potluck theme is St. Patrick's even though it was on the 17th. Our **program** will be Gaylan Graves will be giving a presentation on intarsia. I for one am looking forward to this.

Looking forward to Saturday
Sara

March Birthstone - Aquamarine & Bloodstone

For the lucky people with March birthdays, two birthstone are associated with this early spring month:

Aquamarine and Bloodstone

Aquamarine: The serenely colored aquamarine invokes the tranquility of its namesake, the sea. In fact, the name aquamarine is derived from the Latin word aqua, meaning water, and marina, meaning the sea.

The second birthstone for March is bloodstone, a dark-green gemstone flecked with vivid red spots of iron oxide. Generally found embedded in rocks or in riverbeds as pebbles, primary sources for this gemstone are India, Brazil, and Australia.

Bench Tips

TWISTING WIRE

Twisting wire can be done with an old hand drill but goes much faster with a power tool. My preference is to use a screw gun, although a Foredom should do well.

Just make a little hook out of coat hanger wire (or use a screw-in cup hook) and chuck it up in your screw gun. Grip the free ends of the wire in a vice and slip the looped end onto your hook. Keep a little tension on the wires as you twist.

Note that a power drill is too fast a tool for this unless you have one with variable speed.

SOLDERING PRONGS

I often use prongs to hold an irregular cab or other object on rings and pendants. But prongs can be a little tricky to solder. You have to find some way to hold them all upright while soldering, and the simple butt joint that looks strong sometimes breaks when you start to bend the prong over the stone. There's nothing worse than having a prong break off when you're setting the stone *#~*!

I solved both problems with one little trick. It keeps the prongs in position for soldering, and it gives you a stronger joint at the same time.

Locate and center punch the position for each prong. Then drill holes a little smaller than your prong wire. Sand a small taper on the ends of your prong wires and stand them up in the holes. The wires support themselves, soldering is easy, and the joint is stronger because of the increased soldering area.

REGULAR MONTHLY MEETINGS

- Instructors Meeting — 1st Tuesday 2:30 pm
- Board of Directors Mtg.—1st Tuesday 4 pm
- General Meeting 3rd Saturday 12-1:30 pm
Pot Luck and Education
- Club Clean up day—4th Saturday 9 am

Victor Valley Gem & Mineral Club was founded in 1947 as a 501/c4 non profit education club. Visitors are always welcome.

Our objective and purpose is to disseminate knowledge of mineralogy and earth sciences. To encourage study in these subjects through various programs. To arrange field trips for exploration, study, and collection of specimens. The preparation, publication, and distribution of articles pertaining to these fields. The encouragement of interest of young people and fostering of classes in mineralogy and lapidary arts.
